Jalan Bacang, East Jakarta, Jakarta, Indonesia 13810 | +62 822 8998 2332 | freyza.kusuma.1@gmail.com

SUMMARY

Full-Stack Developer and Technical Team Lead with 6 years of experience building secure, high-performance web systems and AI-powered platforms. Skilled in NestJS, Node.js, React.js, Laravel, Prisma, and Docker, with expertise in REST API architecture, Salesforce integration, and payment gateway compliance (Midtrans, Xendit, DOKU). Proven success in leading cross-functional teams, optimizing server performance, and delivering PCI-DSS-compliant projects. Passionate about scalable system design, automation, and AI-driven product development.

SKILLS

- **Front-end:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, jQuery, Bootstrap, Tailwind CSS, Figma.
- **Back-end:** Node.js, NestJS, Express.js, PHP, Laravel, CodeIgniter, RESTful API Design, Prisma ORM.
- **Database:** PostgreSQL, MySQL, Microsoft SQL Server, Redis, Query Optimization, Indexing.
- **DevOps / Server Management:** Docker, Docker Compose, CI/CD Pipelines, WHM/cPanel, Nginx, Apache, Git, GitHub.
- **AI / Data Science:** Python, TensorFlow, Scikit-learn, Pandas, NumPy, Data Mining, NLP, YOLOv8 Object Detection.
- **Tools & Platforms:** JIRA, Postman, Apidog, VS Code, Slack, Salesforce Integration, Midtrans/Xendit/DOKU Payment Gateway, Basecamp Project Management.
- **Soft Skills:** Leadership, Problem-Solving, Effective Communication, Teamwork, Adaptability, and Analytical Thinking.

PROJECTS

NOTCH ERP System – NOTCH Creative Agency

Tech Stack: TypeScript, Next JS, NestJS, Redis, PostgreSQL, Prisma ORM, Face Recognition, Google Maps API

- Developed a centralized ERP platform integrating project tracking, HR, and employee management modules.
- Implemented Redis caching and query optimization, reducing page load time by 45%.
- Added face recognition powered by AI for secure attendance (Local AI + DeepFace Library from HuggingFace) and integrated Google Maps API for location tracking.

NOTCH Web Landing Page – NOTCH Creative Agency

Website: <https://notch.id>

Tech Stack: TypeScript, Next JS, Tailwind CSS.

- Built a responsive, SEO-friendly landing page framework for multiple client websites.
- Designed reusable components and improved Lighthouse performance score by 35%.

Salesforce REST API Middleware for UNICEF Indonesia Website – NOTCH Creative Agency

Github: <https://github.com/commoners1/unicef-sf-middleware>; <https://github.com/commoners1/unicef-sf-dashboard>

Tech Stack: TypeScript, NestJS, React JS (Vite), Redis, BullMQ, PostgreSQL, Prisma ORM, Telemetry, Jest

- Created REST API middleware to synchronize Salesforce donations with UNICEF's web platform.
- Implemented BullMQ queues to handle concurrent requests efficiently, improving reliability.
- Added telemetry and Jest tests for monitoring and ensuring high code coverage.

UNICEF Indonesia Website – NOTCH Creative Agency

Website: <https://supportunicefindonesia.org> | *GitHub:* <https://github.com/commoners1/d-uncf-rdv>

Tech Stack: Lambemu Framework (PHP), HTML, CSS, Bootstrap 4, JavaScript, jQuery, MySQL, Midtrans Payment Gateway, Xendit Payment Gateway, DOKU Payment Gateway.

- Managed migration, SSL integration, and performance optimization for UNICEF Indonesia's official fundraising platform.
- Enhanced payment process flow, ensuring compliance with PCI DSS and reducing transaction failures.

FreyKu.AI Personalized Chatbot – Personal SaaS Project

GitHub: <https://github.com/commoners1/freyku-ai-chatbot>

Tech Stack: TypeScript, React.js, NestJS, Python, FastAPI, Celery (Worker), Qdrant, Redis, Prisma, PostgreSQL, LocalStack (AWS Alternative but Compatible with AWS Environment), Docker, Jest, Tailwind CSS, OpenAI Model, Llama AI Model, Xendit Payment Gateway.

- Built a responsive website (Mobile-first Development).
- Built a mobile-first, responsive web application optimized across devices.
- Integrated OpenAI APIs (GPT-4o) and LLaMA models to power AI-driven features.
- Implemented subscription, billing, and usage-based analytics to track and manage user consumption.
- Designed and implemented a microservices-based architecture for scalability, maintainability, and ease of extension.
- Integrated Xendit payment gateway to support secure and reliable transactions.
- Developed self-learning capabilities using multiple data sources (web scraping, PDF, and text files), personalized to user preferences.
- Enabled embeddable deployment, allowing the solution to be integrated directly into users' websites.

EXPERIENCE

PT DERAJAT UTAMA KREASI (NOTCH)

Jakarta, Indonesia

Senior Project Web Developer

Nov 2025 – Present

- Architect, develop, and maintain web applications, from system design through implementation and deployment.
- Remain hands-on with coding, delivering features, fixing bugs, and refactoring to maintain code quality and performance.
- Manage application infrastructure and DevOps workflows, including server setup, deployment pipelines, monitoring, and production stability.
- Own project timelines and delivery planning: estimate effort, define milestones, prioritize tasks, and manage risks.
- Lead and mentor junior web developers by assigning tasks, reviewing code, and enforcing best practices.
- Decide and balance work between new feature development and ongoing maintenance/support.
- Act as the division's technical representative in vendor and partner meetings; raise issues, track resolutions, and communicate progress to stakeholders.

Web Developer (Team Lead)

Nov 2023 – Present

- Enhancing internal and external company websites to improve performance, stability, and user experience.
- Identifying and resolving technical issues, monitoring for suspicious activities, and ensuring reliability of server-hosted websites.
- Monitoring and updating website processes to comply with changes in payment gateway regulations.
- Debugging and optimizing code for improved functionality, maintainability, and performance.
- Conducting daily system monitoring and inspections to optimize overall website and server performance.
- Hosting and maintaining multiple websites, ensuring high availability, data integrity, and security compliance.
- Managing databases, including query simplification, indexing, and performance optimization for efficiency.
- Delegating bugs, issues, and feature requests to colleagues to ensure quality standards.
- Leading junior web developers, providing technical guidance, conducting code reviews, and assisting in problem-solving discussions.
- Creating and estimating development timelines, ensuring deliverables are met according to client requirements.
- Brainstorming with junior developers to identify optimal solutions and strategies for client projects.
- Managing multiple web development projects simultaneously, balancing workloads and deadlines effectively.
- Delivering monthly project and performance reports on client sites.
- Ensuring team alignment with client expectations and organizational goals through continuous communication and process improvements.

COMPUTER NETWORK SERVICES GROUP

Senior IT Developer

Port-Vila, Vanuatu

Apr 2023 – Oct 2023

- Orchestrated the optimization of diverse websites, leveraging cutting-edge technologies to revolutionize website performance; boosted conversion rates by 45%.
- Resolved critical web development issues across multiple projects, optimizing load times by 40% and reducing bounce rates by 25% through implementation of advanced caching techniques and performance optimizations.
- Streamlined the production pipeline by incorporating rigorous testing and debugging procedures; achieved enhanced process efficiency and a 35% decrease in production-related errors.
- Performed frequent maintenance on several users' and company's databases and websites, optimizing their processes and usage up to 60%.

PT AKSES PRIMA INDONESIA

Full-Stack Developer

Jakarta, Indonesia

Dec 2022 – Apr 2023

- Generated websites leveraging extensive technologies, aiding users to modernize business processes considerably.
- Contributed in plenty of meetings with users, attaining all information regarding a project and its challenges.
- Enforced daily care on users and the company's website, reducing cases of trouble caused by any cyber-attack.
- Revamped sites to encounter high performance by executing testing and debugging steps in development mode.

IFCA SOFTWARE INDONESIA

Software Consultant

Jakarta, Indonesia

Nov 2019 – Dec 2022

- Enhanced the speed of project execution by enabling users to set up the IFCA application on their devices, as well as migrating their existing data into it if any.
- Led users to understand how to access and operate the IFCA application for the first time by conducting training sessions routinely as scheduled.
- Tailored the IFCA application to align with users' preferences by implementing a user-centric design framework, resulting in a 40% increase in user satisfaction and a 25% decrease in user churn rate.
- Proposed various solutions and alternatives to users to answer all concerns regarding the IFCA application, achieving their trust to consult further.
- Addressed up to 100% of data anomalies in users' databases by executing several SQL queries based on analysis, improving users' business processes.
- Participated in multiple meetings alongside users brainstorming about a project, their issues, cases, and preferences related to the IFCA application, reaching great deals from both sides by nearly a hundred percent.

EDUCATION

MERCU BUANA UNIVERSITY

Bachelor of Computer Science

Jakarta, Indonesia

Aug 2024

Major in Informatics Engineering; Concentration in Data Science & Software Engineering.

Cumulative GPA: 3.84/4.0

Relevant Coursework: Calculus, Web Programming, Smart Web Programming, Algorithm and Data Structure, Software Engineering, Object Oriented Programming, Object Oriented Analysis, Mobile Programming, Machine Learning, Natural Language Processing, Data Mining, Deep Learning, and Introduction to AI.

CERTIFICATIONS

- Junior Web Programmer Certification - Indonesian Professional Certification Authority (BNSP).
- Certified Web Developer Associate (CWDA) - PT Atlasfizi Meraki Inovasi.
- Database Programming with PL/SQL - Oracle Academy.
- Crash Course on Python – Google
- Advance Learning Algorithms – DeepLearning.AI
- Supervised Machine Learning – DeepLearning.AI
- Google Cloud Big Data and Machine Learning Fundamentals – Google Cloud

LANGUAGES

- English – Fluent
- German (Deutsch) – Elementary (A1-A2, currently studying B1)
- Indonesian (Bahasa Indonesia) - Native
